Robots.txt file for WIX

Wix automatically manages the `robots.txt` file for you. However, if you need a custom setup, you would need to follow these steps within the Wix dashboard. Here's an example:

Example `robots.txt` for Wix

```
User-agent: *
Disallow: /editor/
Disallow: /users/
Disallow: /sites/
Disallow: /account/
Disallow: /login/
Disallow: /signup/
Disallow: /cart/
Disallow: /checkout/
Allow: /sitemap.xml

Sitemap: https://yourwixsite.com/sitemap.xml
```

Make sure to replace your own website sitemap's URL.

(Also make sure to rename the file to robots.txt before uploading it to your WIX website)
