Robots.txt file for shopify

Shopify automatically generates a robots.txt file for your store, but you can customize it using the `robots.txt.liquid template`. Here is an example of a typical robots.txt file for Shopify:

Example of a `robots.txt` **for Shopify**

```
User-agent: *
Disallow: /admin/
Disallow: /cart
Disallow: /checkout
Disallow: /orders
Disallow: /account
Disallow: /collections/*sort_by*
Disallow: /collections/*filter*
Allow: /sitemap.xml

Sitemap: https://yourshopifystore.com/sitemap.xml
```

Make sure to replace your own website sitemap's URL.

(Also make sure to rename the file to robots.txt before uploading it to your shopify website)
